Salt Management Plan Template Now Available!

For those municipalities needing assistance with the preparation of their salt management plan, OGRA has developed a **template for a basic salt management plan**. Municipalities can download the template from the OGRA website and customize the plan by adding information and data relating to local operational plans, equipment and resources for winter maintenance.

The template for a basic salt management plan is now available on the OGRA website, in the winter maintenance section: www.ogra.org

Note: Upon completion of your salt management plan, *do not send* your salt management plan to Environment Canada. You are required to report that you have your salt management plan completed in the **Annual Road Salt Report due June 30, 2005**.

Important Dates

April 3, 2005	Due date for completion of salt management plans by road authorities/ municipalities that have submitted a "Letter of Intent" to Environment Canada
June 30, 2005	First Annual Road Salt Report to Environment Canada

For further information, contact the OGRA office at 905-795-2555 or Frank Hull frank@ogra.org, Brian Anderson brian@ogra.org or Heather Crewe heather@ogra.org
